Experiment -1

AIM: To create an AWS free tier account to provision the resources.

Description:

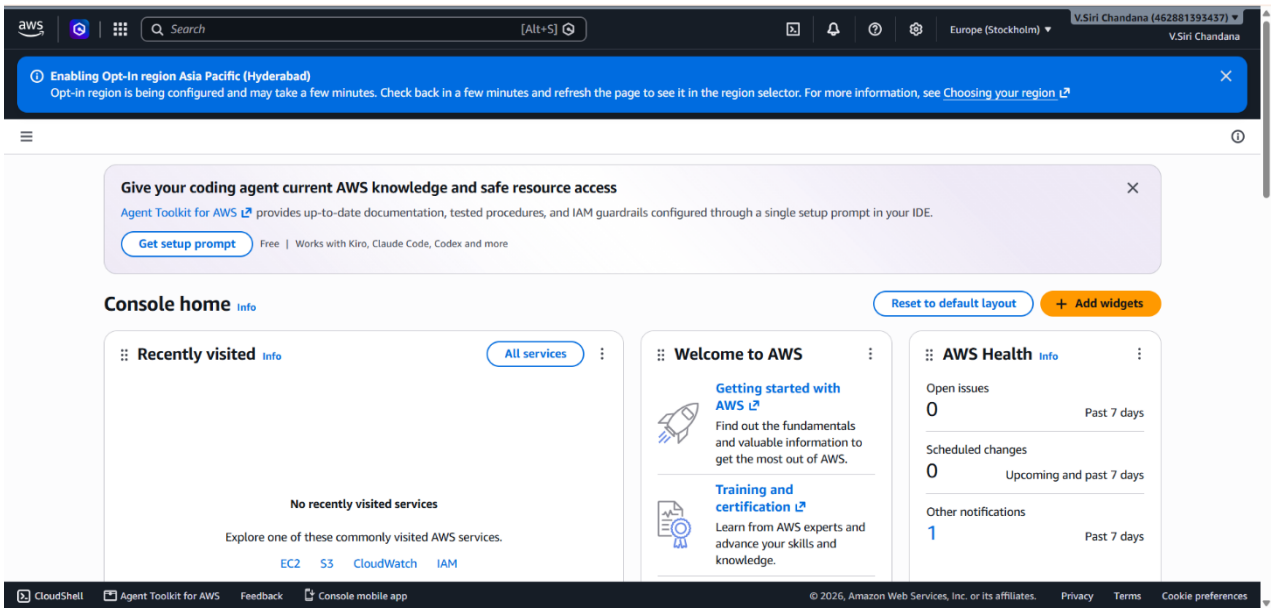

AWS (Amazon Web Services) is a cloud computing platform that provides various services such as computing, storage, networking, and databases over the internet. It enables users to access and manage computing resources without maintaining physical hardware.

The AWS Free Tier allows users to explore and use selected AWS services within specified usage limits. It helps beginners understand cloud computing and gain practical experience with AWS services. By creating an AWS account, users can access the AWS Management Console and provision cloud resources based on their requirements.

Steps:

1. Open a web browser and visit the official AWS website.
2. Click on the **Create an AWS Account** option.
3. Enter a valid email address and account name.
4. Verify the email address using the verification code.
5. Create a strong password for the AWS account.
6. Enter the required personal and contact details.
7. Complete the payment information and identity verification process.
8. Select the appropriate support plan.
9. Complete the AWS account registration process.
10. Sign in to the AWS Management Console using the registered credentials.
11. Explore the available AWS services in the console.
12. Open the AWS Free Tier section and check the available services and usage limits.
13. Select the required AWS service and provision cloud resources according to the experiment requirements.
